

Check On Me Senior Reassurance Program

How It Works

The Check On Me Program eases the concern of friends and family who may find it difficult to maintain consistent, reliable contact. The Program brings a sense of comfort into every client's home.

Our system consists of a personal computer system with various features. The computer stores client's names, numbers and call times. Each day at the client's designated time, the system will call each person. A short pre-recorded message is played asking the person to respond by pressing 1, 2 or 3.

- 1— I am OK
- 2— Transfer call to CCHC
- 3— Send text message to Emergency Contact

If the client doesn't answer after 3 call attempts, a text message is sent to the client's emergency contact. The message informs the emergency contact that the client did not answer his/her reassurance call.

Our Check On Me Program also provides our clients with doctor appointment and medication reminders.

This service is provided for free to all clients serviced by Covenant Connections Home Care.

Contacting an elderly person or a home bound individual on a daily basis helps to reassure their well being and give them a feeling of security.
